Russia

Dear Professor Sukhorukov:

ISQ – Instituto de soldadura e Qualidade (www.isq.pt) is a private and independent organization, founded in 1965, offering technical inspection, training and consultancy services, supported by research and development activities and by accredited laboratories.

Our growth strategy involves an ever larger sustainable presence in the world, with offices, delegations and associated companies in Angola, Algeria, Brazil, China, Cuba, Spain, French Guiana, Iran, Mexico, Norway and Turkey.

We are notified body in under Directive: 2000/9/EC Cableway installations designed to carry persons .

There is 4 years we come operating with equipments INTROS for the MRT (Magnetic Rope testing) method, the results are wonderful, where we have managed to detect many defects in rapid and effective form that has avoided catastrophic faults.

If you want to know more about our company don't doubt in contact us or review our website

Best regards

A handwritten signature in black ink, appearing to read 'Gomes Ferreira', with a long, sweeping flourish extending to the right.

Eng. Gomes Ferreira
