

Professor Vasily Sukhorukov,
President of INTRON PLUS,
Krasnokazarmennaya Str. 17,
Moscow 111250, Russia

Dear Professor Sukhorukov,

Bridon is the World's leading specialist in the manufacture of wire & rope solutions for the most demanding applications – *delivering reassurance through unrivalled experience.*

Bridon *Xtreme* - The focused range of highest specifications for the most demanding oilfield applications including drilling lines, riser tensioner lines, anchor lines, mooring tethers, SPM & tandem offloading moorings & deepwater handling equipment. Bridon *Endurance* – High quality ropes for cranes, hoists and general engineering offering improved performance. In support of Bridon's extensive range of specialist fibre & steel products offering detailed technical support, in-house engineering, dedicated Project Management & International Service personnel to oversee all aspects of your application needs, throughout design, specification, manufacture, supply, commissioning & maintenance.

From 2005 Bridon International has been using wire rope tester INTROS produced by Intron Plus.

We use this equipment for inspection of ropes in mines, industrial cranes, offshore cranes and winches, aerial ropeways. This instrument satisfies most of our needs showing good LMA accuracy and LF sensitivity. Maintenance of the delivered instruments is quite good and we are satisfied with consultancies we promptly receive from Intron Plus.

The main advantage of the INTROS is comparatively small weight and size, especially weight and size of the data logger that is capable to store testing data for further downloading and analysis. It is ruggedly designed for use in a heavy environment. The WINTROS software which is delivered along with the equipment has a wide range of capabilities and sufficiently simplifies a problem of data interpretation.

We also wish to underline that Intron Plus is a company capable to improve its product according to customer needs. It was following our request that the rope tester INTROS with higher LF sensitivity was developed and delivered to Bridon.

BRIDON International Limited

Icon Building – Firstpoint, Balby Carr Bank, Doncaster, UK, DN4 5JQ Tel +44 (0) 1302 565100 Fax 44 (0) 01302 565190 www.bridon.com
Registered in England Number 416671 Registered Office: Precision House, Arden Road, Alcester, Warwickshire, UK, B49 6HN

It is Bridon's intention to extend the rope inspection business, particularly offshore and we would be looking for a wider co-operation with Intron Plus in the future.
