

## **Letter of recommendation**

To Whom It May Concern:

It is a distinct pleasure to recommend to everyone my esteemed business partner from Russia, Intron Plus Ltd. In my capacity as President of Caucho Service Ltda. I am still working closely with Intron Plus Ltd. for almost more than five years.

Intron Plus Ltd. as leading supplier of non – destructive equipment has designed many kind of different equipment for NDT inspections and always provides a customer really need.

Caucho Service Ltda. performs the service and maintenance of the belts and conveyor belts for mining in Chile from 1997. Our company meets all requirements of various mining facilities and services that companies require.

The commitment of our company and its clients is permanent and therefore maintain a policy of constant modernization of equipment; we provide a steel-cord conveyor belts Non- Destructive inspection service with an Introcon S-1000 manufactured by Intron Plus Ltd.

We have started to use the INTROCON scanner system from 2006 and from the beginning the equipment shows as one of the best devices to detect broken wires, missing, corrode and to carry out the control of the integrity of the belt sections, measuring faults between the broken wires on the splices.

The scanner's portability and easy to use allow it to be installed quickly, a portable data logger, the accuracy with the LMA and LF measuring mode, made of the Introcon system one of the most reliable according these particular features.

I would without any reservation recommend the Intron Plus Ltd. NDT equipment manufactured by Intron Plus Ltd.

Sincery

Caucho Service Ltda.

Patricio Jerez Miranda  
General Manager
