

## ..... Our focus .....

The Oman Section of the American Society for Nondestructive Testing ([www.asnt.org](http://www.asnt.org)) is organizing a localized two-day Inspection & Integrity Conference with exhibitions.

Your participation will introduce you to many advanced and proven nondestructive testing (NDT) technologies for the highest integrity of your operating facilities by minimizing or avoiding shutdowns altogether. This will be done through technical presentations, workshops and table-top exhibits of NDT equipment.

This event will bring together NDT service and equipment providers with industries and facilities that need NDT technologies, some of which will be brought to Oman by the developers themselves.

NDT is a necessary integral part of On-Stream Inspection (OSI), Risk Assessment or Plant & Equipment Integrity Studies, Fitness for Service (FFS) and Risk-Based Inspection (RBI) programs. The RBI program has been adopted by API and included in its requirements, and so has ASNT certification. Most of the input data for these programs comes from NDT, from the most basic to the most advanced methods. In equipment integrity programs, corrosion loops are established that rely on NDT input.

This conference will also be a great opportunity to network with local ASNT members and Corporate Partners, NDT service and equipment providers and their clients. As the NDT industry's largest professional society, ASNT exists to create a safer world by advancing scientific, engineering, and technical knowledge in the field of nondestructive testing.™

Oman Inspection  
& Integrity  
Conference

Hear Case Studies by  
Experienced **Professionals**  
from Other local  
Oil and Gas companies.

.....

16-17 Oct, 2019

See you on 16-17 October

At Hormuz Grand Hotel,  
Muscat, Oman

Book before 25<sup>th</sup> September

**This 2-day event offers a unique insight** into the experiences of your peers, and gives you an in-depth understanding of how their strategy compares, and crucially, how you can make a difference to yours. Because no two integrity strategies are the same, Oman first inspection and integrity conference is streamed so you can pick and choose the best agenda for your needs from the inspection technologists.

**Learn from the successes and failures of your peers** and walk away better equipped to overcome the rigorous demands of your current inspection and integrity challenges.

**That's why on the 16-17 Oct 2019**, integrity specialists and inspection technologists facing these challenges will share with you their successes and failures in managing integrity in both regional and global operations.
